EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Kesterson (Reg. No. 25,882) on 11/18/2005.

The application has been amended as follows:

In claim 1, please add "on said circuit board" between "portions" and "." on line 11.

In claim 14, please add "so that said first and second memory modules are serially connected between said first and second signal bus portions on said circuit board" between "modules" and "." on line 10.

In claim 20, please add "so that said first and second memory modules are serially connected between said first and second signal bus portions on said circuit board" between "modules" and "." on line 7.

Allowable Subject Matter

Claims 1 – 10, and 11 – 20 are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claim 1, the limitations **a flexible bridge connecting said first and second memory modules for providing a signal bus between said memory modules, so that said first and second memory modules are serially connected between said first and second signal bus portions on said circuit board**, when read within the remainder of the claim, makes claim 1 allowable over the prior art.

Claims 2 – 10, 12, and 13 are allowed based upon their dependency to claim 1.

With regard to claim 14, the limitations **a flexible bridge connecting said first and second memory modules for providing a signal bus between said memory modules so that said first and second memory modules are serially connected between said first and second signal bus portions on said circuit board**, when read within the remainder of the claim, makes claim 14 allowable over the prior art.

Claims, 15 – 19 are allowed based upon their dependence to claim 14.

With regard to claim 20, the limitations **a flexible bridge connecting said first and second memory modules for providing a signal bus between said memory modules so that said first and second memory modules are serially connected**

between said first and second signal bus portions on said circuit board, when read within the remainder of the claim, makes claim 20 allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew D. Spittle whose telephone number is (571) 272-2467. The examiner can normally be reached on Monday - Friday, 8 - 4:30.
